

MIT APP INVENTOR

MIT App Inventor is an incredible web application that helps users build interesting Android applications. It is a block-based programming tool through which users can create fully functional apps for Android devices such as smartphones, tablets etc.

Step 1:

- # Open MIT App inventor in browser.
- # Click create apps in the website.

Step 2:

Create user interface from the MIT App Inventor

Various components are used to design the app and give a look and feel appearance.
